Re: Permit Renewal  
Permit No. 7711A  
Asphalt and Roofing Materials Manufacturing Facility  
Dallas, Dallas County  
Account ID No. DB-0378-S

Dear Mr. Hage:

This will acknowledge receipt of your application for the above-referenced permit renewal. We have determined that your application is deficient, and additional information is needed to enable us to continue with our review. Please furnish the information indicated as follows:

1. Provide an amendment application to include your production Line 1 in this permit and to reflect the production changes from felt backing to fiberglass mat backing for the roof shingle production on this Line 1.
2. Provide emissions, calculations, and emission points of CECO filtered vents for storage tanks and the asphalt fume emissions that are not captured in the line coating and are vented out the steam vents which are not represented on the permit.
3. Provide best available control technology for the above emissions.

Also, please note that Texas Natural Resource Conservation Commission (TNRCC) has an Internet site that has proven helpful to many air permit applicants. The site includes Air Permits Division forms, tables, guidance documents, and state air regulations. The address is [http://www.tnrcc.state.tx.us/air/nsr\\_permits/nsrhome.htm](http://www.tnrcc.state.tx.us/air/nsr_permits/nsrhome.htm).

After receipt of all the additional information, we will continue the review of your application. If the information furnished in response to this notice results in the need for further clarification or additional information, we will communicate that need as soon as possible. You are reminded that 30 Texas Administrative Code Section 116.116(a) states that all representations made in a permit application become conditions upon

Mr. Cesar Hage

Re: Permit No. 7711A

which a permit is issued. Any variations from these representations require prior authorization from the TNRCC.

Failure to submit all the requested information within 30 days of the date of this letter may result in the administrative voidance of your application. Following an administrative voidance, your application and supporting data, as well as any fees submitted, will be retained for 180 days. To reactivate the voided application, a new PI-1 application form and all the information requested above will be required. Additional fees need not be submitted if the project scope has not increased and the original fee was correct. If all these conditions are not satisfied within 180 days from the date of the voidance, your application will automatically be denied and the entire application, including the appropriate fee, must be resubmitted if you desire to pursue the project.

Thank you for your cooperation in this matter. If you have any questions, please call me at (512) 239-1351, or write to me at Texas Natural Resource Conservation Commission, Office of Permitting, Remediation, and Registration, Air Permits Division (MC-162), P.O. Box 13087, Austin, Texas 78711-3087.

Sincerely,

Earl J. Jones, P.E.  
Air Permits Division  
Texas Natural Resource Conservation Commission
